EXPERIENCE

The Souled Store (omnichannel apparel retail) May 2026 · Oct 2026

Senior Associate Data Analyst, Business Analytics (Retail)

- Sole analytics partner to Retail Operations for **80+ COCO & franchise stores**: own monthly targets, performance reviews and store diagnostics (footfall, conversion, AOV, UPT, ASP, sell-through).
- Category deep-dive on perfume across **74K+ customers** (cohort retention, SKU migration, cannibalisation); store-level targeting from it helped lift perfume share of sales from **1.5% to ~3%**.
- Automated monthly target phasing into daily, state-wise store targets (weekdays, holidays, retail events), cutting **3–4 days** of manual work to a repeatable run.
- Built a store anomaly report combining audit, replenishment, returns, perfume and high-value-bill signals; tracks **20–25 at-risk stores** and flags **10–12 in red** for Retail Ops each cycle.
- Updated the monthly **Store MIS / P&L** and **Revenue Dashboard** (Finance-owned) for **80+ stores across 40+ cities**, and analysed store-wise margins, LFL growth, rent and salary costs to find where costs could be cut and sales grown.
- Automated **15+ reports and alerts** (stock, shrinkage, hourly footfall via API, daily KPI report) with SQL, Python and BigQuery, saving **20+ hrs/week** and moving reporting from weekly to daily.
- Designed a returns-abuse framework for CXOs: flagged high and cross-store returners, who were routed to Customer Experience for call-backs.
- Run the fortnightly franchise business review; built a like-for-like footfall view that showed one store's conversion drop came from fixture damage (display use 100%→43%), not demand.

Snapwork Technologies (Bajaj Finserv-invested) Jun 2025 – May 2026

Business Analyst, Product

- Lead business analyst for an insurance client, delivering the **MediCard & MedGo** health apps and a **corporate HR portal** from requirements to launch.
- Ran sessions with the client and design team to redesign key user journeys, and wrote the **functional specification documents (FSDs)** that engineering built from.
- Acted as the bridge between client and tech teams, turning business needs into prioritised requirements and resolving scope questions during delivery.
- Defined product KPIs and delivered ready-made dashboards (MAU, funnel drop-offs, digital vs offline usage, claim settlement TAT); designed the data model for a Personal Finance Manager (GCash).

Ola Nov 2024 – Apr 2025

Program Manager & Business Analyst

- Built customer cohorting and a cross-category **RFM segmentation** (lifetime order buckets, AOV, frequency, new vs repeat, retention) across Food & Grocery, identifying champions, at-risk and dormant users; targeted UX and marketing interventions lifted **repeat orders by 20%**.
- Primary point of contact for launching the **Gift Cards category on ONDC**, working with Directors and stakeholders to define the data-backed launch strategy and execution framework.
- Ran platform-wide reactivation analysis (category frequency, last-order-time cohorts) to size and target lapsed users for win-back campaigns.
- Picked **dark-store locations for Ola Grocery** through geospatial analysis (Python, GeoPandas, Folium, SQL) of order density, delivery feasibility and demand.
- Built automated KPI dashboards (conversion, inventory turnover, sales growth) on real-time Hive/Presto pipelines, used by leadership to track category expansion.
- Built an internal AI agent, **"Kya Chal Raha Hai"**, for the **CEO's office** that summarises weekly updates across the organisation into progress and blockers (Gmail API, Ollama).

Deutsche Bank Jul 2024 – Sep 2024

Data Analyst (Internship)

- Analysed large financial datasets in SQL and Python to surface **credit-risk patterns, liquidity shifts and transaction anomalies**, and flagged reporting discrepancies.
- Built statistical and predictive models (scikit-learn, statsmodels) to support risk analysis and improve forecasting.
- Automated recurring financial reports and built **Tableau dashboards**, cutting manual reporting effort for risk and finance teams.

Digii (formerly CollPoll) Jan 2024 – Jun 2024

Product Specialist (Internship)

- Onboarded university clients onto the platform and integrated it with their existing systems.
- Used data analysis on the examination module to **automate question-paper generation**, improving the product workflow for clients.

SKILLS

Data & Analysis	SQL (MySQL, BigQuery, Hive, Presto), Python (pandas, NumPy, scikit-learn), Advanced Excel, Google Sheets
BI & Automation	Power BI, Tableau, Looker Studio, scheduled Python pipelines, Google Sheets/Drive APIs, REST APIs
Methods	Cohort & RFM analysis, LFL/YoY, funnel analysis, A/B testing, forecasting, target setting, root-cause analysis, P&L
Product & BA	Requirements gathering, FSDs, user journeys, KPI design, stakeholder management
AI	NLP (FinBERT), FAISS, LLM agents (Ollama); Claude and ChatGPT for faster analysis and automation

PROJECTS

AI-Powered Investment Advisor Chatbot *(Python, FinBERT, FAISS, SentenceTransformers, yFinance, BeautifulSoup)*

- Recommends stocks by combining news sentiment (FinBERT) with live fundamentals such as market cap, P/E and 52-week high.
- Scrapes and embeds stock news into a FAISS index for semantic search, so every answer draws on the latest relevant articles.

Reinforcement Learning Stock Trading Agent *(Python, FinRL, A2C)*

- Trained an Advantage Actor-Critic agent to allocate a stock portfolio dynamically from historical market data.
- Backtested it against mean-variance optimisation and the Dow Jones Industrial Average.

Real-Time Violence Detection & Alert System *(Python, MobileNetV2, OpenCV, Telegram API)*

- Edge-optimised computer-vision model that detects violence in live video and sends instant GPS-tagged alerts through a Telegram bot.

EDUCATION & CERTIFICATIONS

Vellore Institute of Technology : B.Tech, Computer Science & Engineering (CGPA 7.18) 2020 · 2024

Class XII (CBSE), Rajhans Vidyalaya, Mumbai: 84% 2020

Class X (ICSE), Lilavatibai Podar High School, Mumbai: 82% 2018

Certifications: Microsoft Azure AI Fundamentals · McKinsey.org Forward Program · Financial Markets (Yale) · Supervised ML (DeepLearning.AI / Stanford Online)
